

DM006

Manual single-drum vibratory roller

DM006 is designed for compaction of sand, crashed gravel soil and asphalt. It is used for building of parking lots, pathways and sport playgrounds.

- ✓ **New construction design!**
- ✓ **World technologies, specially adapted for extreme weather conditions!**
- ✓ **Reliable Russian and foreign parts, well known on the world market!**
- ✓ **Beneficial terms of warranty!**

Advantages:

High efficiency

- Optimum combination of vibratory frequency and amplitude
- Gravity sprinkler system
- Modern reliable engine Honda with low noise emission
- Hydraulic drive for variable control and direction change

Operation convenience

- Operation next to high curbs till 550 mm
- Operation in narrow passages

Service and maintenance

- Easy access to the service points
- Minimum service expenses
- Transportation on the trucks with 600 kg carrying capacity

Technical data:

Operating weight,kg	520
Amount of vibratory drums	1
Drum diameter, mm	560
Drum width, mm	720
Frequency, Hz	70
Exciting force, kN	15,2
Operation speed, km/h	0-3,7
Gradeability, degree	15
Engine	Honda GX390
Engine power, kW (hp)	9,5 (13)
